Hot Runner Systems

Hello

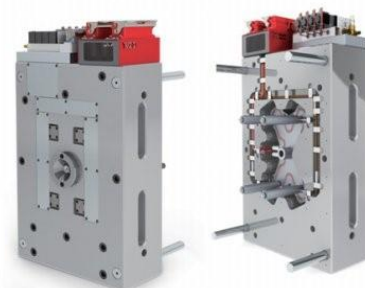

Welcome back to this edition of our newsletter. In this issue, we are going to introduce *Custom Mould Bases & Hot Halfs* and the coming exhibition in Guangzhou, China

Custom Mould Bases & Hot Halfs

With the ever increasing demand for local toolmakers to be competitive on price and delivery compared to the imported option. YUDO OCEANIA can provide custom mould bases precision machined up to as much as 80-90% complete allowing you to reduce your costs by minimizing the labour input from yourself ultimately providing you a closer fixed cost and the ability for you to provide a quicker turnaround. With this service you retain 100% control of the quality as full cad drawings are provided for approval prior to manufacturing. We can provide precision pockets, profiles, cooling lines, support pillars, ejector guide pins, bushes and ejector pin holes and more. If a Hot runner system is required, we can also match the custom mould base with a YUDO HOT HALF fully wired turnkey system. The hot runner system is fully designed by YUDO taking into consideration the application needs and supported by a mould flow if required. A range of tool steels are available and all plates are precision surface ground. We offer a high standard of quality and a reliable delivery date. Generally, delivery time is approximately 6 weeks.

Custom Mould Bases

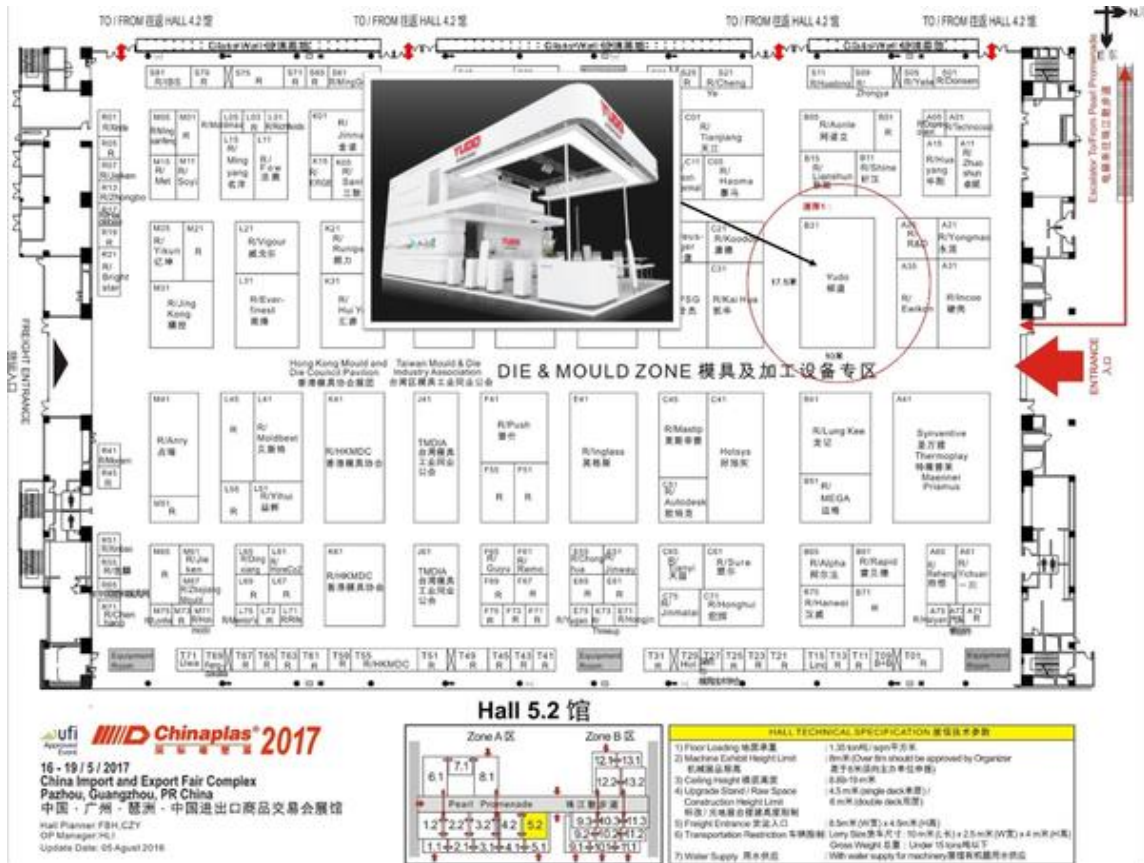

Hot Halfs

YUDO at Chinaplas 2017

YUDO at Chinaplas 2017 held in Guangzhou May 16-19 Hall 5.2 stand B31
